

Refined texture. Reliable strength.

### What is Milife®

Milife® is a 100% fine-denier polyester nonwoven fabric with a soft, silk-like surface. Its unique layered filament construction gives it a smooth, elegant appearance, making it ideal for decorative packaging, apparel, and interior applications like wallpaper.

Beyond aesthetics, Milife® also delivers functional performance. It has been used in high-performance textiles including boat sails, tent insulation, and sleeping bag liners, where its lightweight strength and thermal properties are valued.

Milife® is highly versatile and customizable. It can be laminated, printed, dyed, or combined with other materials to meet a wide range of design and performance requirements.

### Features

- 100% Denier Polyester
- Smooth Glossy Surface
- Lightweight and Thin
- Lamination with other materials

### Applications

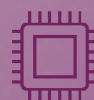

- Packaging Solutions
- Apparel
- Performance Fabrics
- Decorative Materials
- Tapes

Silk Like Touch
