

**Refined texture. Reliable strength.**

### What is Milife®

Milife® is a 100% fine-denier polyester nonwoven fabric with a soft, silk-like surface. Its unique layered filament construction gives it a smooth, elegant appearance, making it ideal for decorative packaging, apparel, and interior applications like wallpaper.

Beyond aesthetics, Milife® also delivers functional performance. It has been used in high-performance textiles including boat sails, outerwear insulation, and sleeping bag liners, where its lightweight strength and thermal properties are valued.

Milife® is highly versatile and customizable. It can be laminated, printed, dyed, or combined with other materials to meet a wide range of design and performance requirements.

### Features

- 100% Fine Denier Polyester
- Smooth, Glossy Surface
- Lightweight and Versatile
- Compatible with Lamination
- Woven Look without the Fraying

### Applications

- Packaging Solutions
- Apparel
- Performance Fabrics
- Decorative Materials
- Tapes

**Silk Like Touch**

**Lightweight Material**

**Dimensionally Stable**
